QUICK FACTS

Plant type
Tree

Evergreen or deciduous
Evergreen with elongated, hairy dark green leaves; may take reddish-purple tones in winter. Open-branched, spreading habit. No significant fall color beyond possible winter bronze. [Woodlanders; Georgia Perennial Plant Association; Promesse de Fleurs]

Growth & Size
Rate: Not stated
Size: Evergreen (or semi-deciduous in colder winters) shrub, typically 3–6 ft tall and wide. Compact to open-branched habit. Moderate growth. [Woodlanders; PlantLust; Georgia Perennial Plant Association; Almost Eden]

Soil
Not stated

Sun

Water

Zone 8a
Hardy Zones 7–9 (some reports to Zone 4–8 or 8–9). Suitable for Atlanta Zone 8a. May be semi-deciduous in colder winters. Best with protection from cold drying winds. [Woodlanders; PlantLust;

Native
Not stated

ORIGIN AND CHARACTERISTICS

Origin
Japanese origin; likely hybrid or form of Rhododendron macrosepalum (sometimes treated as R. stenopetalum 'Linearifolium' or related). Introduced to US in 1929 (USDA PI 77142). American Rhododendron Society Azalea of the Year 2015. [Woodlanders; Dave Creech; Azalean historical notes]

Form
Evergreen with elongated, hairy dark green leaves; may take reddish-purple tones in winter. Open-branched, spreading habit. No significant fall color beyond possible winter bronze. [Woodlanders; Georgia Perennial Plant Association; Promesse de Fleurs]

Establishment
Plant in part shade in moist, acidic, well-drained soil. Mulch with pine straw or bark. Prune after flowering if needed. Suitable for massing, slopes, borders. [Almost Eden; Georgia Perennial Plant Association]

HEALTH

Problem	Symptoms
Health	Generally durable and low-maintenance. Standard azalea issues (lacebug, root rot in poor drainage) possible but not specifically reported as severe on this cultivar. [Almost Eden; Woodlanders]
