QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Hardy in Zones 3–8/9. Performs as a perennial in Atlanta with good drainage and summer dry conditions. Pre-chilling may improve reliability in warmer microclimates

Growth & Size
Rate: Not stated
Size: Height 8–12 in (20–30 cm). Spread 4–8 in

Sun

Water

Soil
Well-drained; chalk, loam, or sand. Tolerates poor soil

Zone 8a
Hardy in Zones 3–8/9. Performs as a perennial in Atlanta with good drainage and summer dry conditions.
Pre-chilling may improve reliability in warmer microclimates

PLANTING NOTES

Establishment
Plant bulbs in fall, 4–6 in deep, 4–6 in apart, in full sun and well-drained soil. Leave foliage until it yellows. Naturalizes well by offsets and stolons when happy.
Good for rock gardens, containers, and front of borders

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of *Tulipa clusiana* (native to Iraq, Iran, Afghanistan, Pakistan, and the western Himalayas).
Award of Garden Merit

Form
Slender, upright bulbous perennial. Narrow, pointed flowers that open star-like in sun. Also known as candy tulip or radish tulip. Strong perennializer among tulips

Foliage
Narrow, linear, glaucous gray-green leaves, 2–5 per bulb

Flowers and fruit
Not stated

Bark
Not applicable (bulbous perennial)

HEALTH

Health
No serious problems stated. Bulbs are toxic if eaten. Skin allergen; wear gloves when handling.
Avoid wet soils to reduce basal rot risk

Symptoms
None stated
