QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Suitable for Atlanta Zone 8a. Hardy Zones 4–10. Prefers consistently moist to wet soil. Afternoon shade beneficial in hot climates to reduce leaf scorch. Not stated for specific Atlanta urban performance beyond general hardiness and moisture preference

Growth & Size
Rate: Not stated
Size: - 2–2.5 ft tall × 1.5–2 ft wide.
- Some nursery list to 4 ft (Moana

Sun

Water

Soil
- Consistently moist to wet soil. - Rich, organic soil.
Not particular as to pH

Zone 8a
Suitable for Atlanta Zone 8a. Hardy Zones 4–10. Prefers consistently moist to wet soil. Afternoon shade beneficial in hot climates to reduce leaf scorch. Not stated for specific Atlanta urban performance beyond general hardiness and moisture preference

ORIGIN AND CHARACTERISTICS

Origin
- Cultivar of Acorus calamus, which is native to Central Asia and introduced to North America. - Not native to North America

Form
- Clump-forming herbaceous perennial. Spreads slowly by creeping rhizomes. Iris-like, sword-shaped leaves emerge from rootstock

Foliage
- Sword-shaped leaves striped with white and green. Leaves and rhizomes sweetly scented when crushed. - Deciduous.
Scorched leaf tips if soil dries

Flowers and fruit
- Inconspicuous greenish spadix. Flowers not showy.
- Sterile triploid; does not produce viable seed

Bark
- Not applicable (herbaceous perennial)

PLANTING NOTES

Establishment

- Plant in moist to wet soil or at pond/stream margins. Divide in spring if center thins. - Container planting in water gardens can limit spread

HEALTH

Health

- No serious insect or disease problems stated.
- Leaf scorch if soil dries

Symptoms

None stated
