QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Herbaceous perennial

Growth & Size
Rate: Not stated
Size: 23 in (58 cm) tall × 3 ft (90 cm) wide typical.
Compact, wider than tall. Some trial sizes ~28 × 58 in.
Fewer stems than most Baptisia

Sun

Water

Soil
Moist but well-drained. Fairly adaptable.
Prefers well-drained. Avoid wet

Zone 8a
Hardy Zones 4–9. Suitable for Atlanta Zone 8a. Drought-tolerant once established. Prefers full sun and well-drained soil. May go dormant by late summer in heat; plan companions accordingly

PLANTING NOTES

Establishment
Low maintenance. Plant where early dormancy can be masked by neighbors. Best in well-drained soils. Permanent location. Good for front of border or where horizontal form is desired

ORIGIN AND CHARACTERISTICS

Origin
Hybrid involving *B. bracteata* and *B. australis*.
Bred at Chicago Botanic Garden

Form
Herbaceous perennial. Compact, open habit. Horizontal inflorescences. May go dormant by August. Hybrid (*B. australis* × *B. bracteata* backcrossed to *B. bracteata*). PrairieBlues series. Early bloom with horizontal spikes. Compact form

Foliage
Trifoliate green leaves. Compact plant

Flowers and fruit
Light lemon-yellow / creamy yellow flowers on horizontally borne inflorescences. Early May for about 3 weeks. Unique horizontal spikes. Attracts pollinators; Gray seed pods

Bark
Not woody

HEALTH

Health
Good to excellent disease resistance. Possible seed weevil. Deer-resistant. No serious problems stated.
May go dormant early

Symptoms
None stated
