QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Herbaceous perennial

Growth & Size
Rate: Not stated
Size: 3–4 ft (90–120 cm) tall and wide. Upright clump.
Deep taproot

Sun

Water

Soil
Average, dry to medium, well-drained.
Prefers acidic, somewhat poor soils. Tolerates clay, loam, sand

Zone 8a
Hardy Zones 4–9. Excellent for Atlanta Zone 8a. Native parentage in the region. Drought- and heat-tolerant once established. Prefers full sun and well-drained, preferably acidic soil

PLANTING NOTES

Establishment
Low maintenance. Plant permanently. May open after bloom and need support, or cut foliage back for compact form (loses pods). Excellent for borders, cottage gardens, prairies, meadows. Heat and humidity tolerant

ORIGIN AND CHARACTERISTICS

Origin
Hybrid of two native southeastern/south-central species. Selected at North Carolina Botanical Garden

Form
Herbaceous perennial. Upright, clump-forming. Deep-rooted; do not transplant once established. Found as random seedling at NC Botanical Garden (introduced 2002).
Vigorous hybrid with soft yellow blooms

Foliage
Trifoliate, clover-like, bluish-green leaves.
Leaflets to 2 in. Attractive all season

Flowers and fruit
Butter yellow / creamy yellow, lupine-like flowers in erect racemes to 18 in. Late April–May (spring). Held well above foliage. Attracts butterflies; Black seed pods. Ornamental

Bark
Not woody

HEALTH

Health
No serious insect or disease problems. Sensitive to juglone. Deer-resistant. Low toxicity if ingested (general Baptisia)

Symptoms
None stated
