QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Upright perennial

Growth & Size
Rate: Not stated
Size: 3–4 ft (0.9–1.2 m) high × 3–4 ft (0.9–1.2 m) wide.
Upright, vigorous herbaceous perennial / tender

Sun

Water

Soil
Average to medium, well-drained, organically rich soil. Heat and humidity tolerant. Good drainage essential

Zone 8a
Hardy in USDA Zones 8–10 (often grown as a perennial in Zone 8a with mulch). Excellent for Atlanta Zone 8a. Large dark violet-blue flowers with black calyces and dark stems. Continuous bloom spring to frost. Heat and humidity tolerant. Anise-scented foliage. Attracts hummingbirds. Patented (PP#27,183)

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Salvia guaranitica (anise sage), native to South America (Brazil, Argentina, Paraguay). Developed by Ball FloraPlant as an improvement over 'Black and Blue'. Patent PP#27,183

Form
Upright perennial. Dark green ovate leaves (anise-scented when crushed). Large vivid cobalt / violet-blue flowers with black calyces on dark stems. Continuous bloom from late spring through fall. Vigorous clumping habit. Attracts hummingbirds and pollinators. Deer resistant. Improved selection of anise sage with larger flowers, darker stems, and earlier bloom than 'Black and Blue'. Continuous color. Hummingbird magnet. Heat and humidity tolerant. Patented. Excellent for Atlanta Zone 8a

Foliage
Not stated

Flowers and fruit
Not stated

Bark
Not stated

PLANTING NOTES

Establishment

Plant in full sun to part sun with well-drained soil. Deadhead spent spikes to encourage continuous bloom. Cut back in late winter or early spring. Excellent for borders, containers, and hummingbird gardens. Water regularly to establish.
Mulch in Zone 8a for winter protection

HEALTH

Health

Generally low maintenance and vigorous. Heat and humidity tolerant. Attracts pollinators. Deer resistant. Requires good drainage. No serious problems stated as dominant

Symptoms

None stated
