QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Suitable for Atlanta Zone 8a as a warm-season annual. Hardy Zones 9–11 as a perennial. Heat and humidity tolerant. Not stated for specific Atlanta overwintering performance; typically treated as annual north of Zone 9

Growth & Size
Rate: Not stated
Size: - 10–14 in tall × 12–14 in wide

Sun

Water

Soil
Prefers moist, fertile, well-drained soil.
Good heat and humidity tolerance

Zone 8a
Suitable for Atlanta Zone 8a as a warm-season annual. Hardy Zones 9–11 as a perennial. Heat and humidity tolerant. Not stated for specific Atlanta overwintering performance; typically treated as annual north of Zone 9

PLANTING NOTES

Establishment
- Plant after last frost in full sun. Start seed indoors 10–12 weeks before last frost if growing from seed. Deadheading not required. Purchase new plants each spring in cooler zones

ORIGIN AND CHARACTERISTICS

Origin
- Cultivar of Angelonia angustifolia, which is native to Mexico and the West Indies. - Not native to North America

Form
- Compact, upright herbaceous perennial.
Grown as annual in cooler zones. Seed-grown Serena series

Foliage
- Narrow, green leaves. Not the primary ornamental feature

Flowers and fruit
- Purple, snapdragon-like flowers in terminal spikes. Blooms continuously from late spring through summer/fall.
Does not require deadheading

Bark
- Not applicable (herbaceous)

HEALTH

Health
- No serious insect or disease problems stated. Watch for aphids or powdery mildew in crowded conditions. Some cultivars have phytophthora resistance; Serena series noted for good resistance in related selections

Symptoms
None stated
