QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 3–6 ft tall (1–2 m), spreading widely (2.5–4+ m). Dense, running bamboo forming thickets. 5–2.5 m × 2.5–4 m),s ands Online (1–1.5 ft to 3–4 ft), Wikipedia (1–2 m), Kew GrassBase

Sun

Water

Soil
Moist but well-drained, fertile, humus-rich soils

Zone 8a
Suitable for Atlanta Zone 8a (hardy to cold temperate zones). Running habit can be invasive — contain with barriers or use in contained areas. Distinctive leaf margins provide winter interest. Prefers moisture and some shade. Good for groundcover or naturalistic plantings if managed. Cold hardy

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Native to Japan (and Sakhalin). Introduced by Veitch ~1880. Not native to North America

Form
Evergreen running bamboo. Erect, slender culms. Spreads rapidly by rhizomes. Dense clumps or groundcover

Foliage
Broadly lance-shaped leaves that develop distinctive pale brown / white margins as they mature (papery light brown edges). Dark green initially. Characteristic margin bleaching

Flowers and fruit
Infrequent flowering (typical of bamboos).
Not a primary feature

Bark
Not stated

HEALTH

Health
Generally low maintenance once established. No serious pests stated. Invasive potential is the main management issue

Symptoms
None stated
