FLOWER

QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Herbaceous perennial

Growth & Size
Rate: Not stated
Size: 8–12 in (20–30 cm) tall and wide. Compact, bushy clump.
Dwarf selection of the species

Sun

Water

Soil
Average, medium, well-drained. Wide tolerance (chalk, clay, loam, sand) as long as drainage is good.
Prefers rich, moist soils. Neutral to slightly acidic

Zone 8a
Hardy Zones 3–8. Suitable for Atlanta Zone 8a. Provide part shade and consistent moisture in summer heat. Short-lived but reseeds

PLANTING NOTES

Establishment
Easily grown. Self-seeds freely and naturalizes. Cut back foliage if it declines mid-summer. Division possible in spring. Good for borders, rock gardens, woodland, containers, hummingbird gardens

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of *Aquilegia canadensis*, native to eastern North America (Canada, northeastern U.S.).
Woodland edges, moist woods

Form
Herbaceous perennial. Bushy, upright clump. Short-lived but self-seeds. Compact selection of the native wild columbine

Foliage
Lobed, divided, biternate dark green (sometimes blue-green) basal leaves. Fern-like. Attractive groundcover effect if kept moist

Flowers and fruit
Nodding red and yellow flowers (scarlet sepals and spurs, yellow inner petals). Late spring to early summer (April–May). Attracts hummingbirds

Bark
Not applicable (herbaceous)

HEALTH

Health
Good resistance to leaf miner (species trait expected to carry over). Deer- and rabbit-resistant.
No serious problems stated. All parts poisonous if ingested

Symptoms
None stated
