FLOWER

QUICK FACTS

Plant Type: Semi-evergreen subshrub / perennial

Evergreen or deciduous
Excellent for Atlanta Zone 8a. Heat and drought tolerant once established. Performs best in full sun with sharp drainage (raised beds or slopes ideal). Long bloom season. Low maintenance; may die back partially in cold winters but rebounds. Great for rock gardens, front of borders, and mass plantings

Growth & Size
Rate: Not stated
Size: 6–12 in (15–30 cm) tall; 12–24 in (30–60 cm) wide.
Dense, mounding, spreading

Sun

Water

Soil
Prefers well-drained, gritty, average to lean soils. Sharp drainage essential. Tolerates alkaline and rocky soils

Zone 8a
Excellent for Atlanta Zone 8a. Heat and drought tolerant once established. Performs best in full sun with sharp drainage (raised beds or slopes ideal). Long bloom season. Low maintenance; may die back partially in cold winters but rebounds. Great for rock gardens, front of borders, and mass plantings

ORIGIN AND CHARACTERISTICS

Origin
Selection of a species native to northern Mexico (and possibly southern Texas)

Form
Compact, mound-forming, woody-based perennial or subshrub. Firm, pettable texture

Foliage
Small, oval-rounded, thyme-like, gray-green to green leaves. Semi-evergreen to evergreen in mild winters. Softly hairy

Flowers and fruit
Tiny, tubular, two-lipped, snapdragon-like, bright pink to rose flowers. Continuous bloom from late spring through fall (May–October), especially after rain. Attracts pollinators

Bark
Not stated

PLANTING NOTES

Planting
None stated

HEALTH

Health
Generally pest- and disease-free. Deer and rabbit resistant. No serious problems stated. Avoid wet soils to prevent root issues

Symptoms
None stated
