QUICK FACTS

Plant Type: Evergreen prostrate groundcover shrub

Evergreen or deciduous
Well adapted to Atlanta Zone 8a. Excellent low-maintenance groundcover for sun or light shade. Handles heat and humidity. Light foot traffic tolerant.
Fall/winter foliage interest. Low

Growth & Size
Rate: Not stated
Size: 9–12 in (22–30 cm) tall; 3–5+ ft (0.9–1.5+ m) wide.
Spreads by long runners that root at nodes

Sun

Water

Soil
Prefers loamy, well-drained soils. Adaptable to a range of pH

Zone 8a
Well adapted to Atlanta Zone 8a. Excellent low-maintenance groundcover for sun or light shade. Handles heat and humidity. Light foot traffic tolerant. Fall/winter foliage interest.
Low pest pressure

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Native to Taiwan (Formosa)

Form
Dense, mat-forming, prostrate groundcover.
Self-rooting branches create a carpet

Foliage
Rounded to ovate, 3–5 lobed, thickly textured, rugose (wrinkled), lustrous emerald green above with felted whitish undersides. Evergreen or semi-evergreen.
May take on reddish or bronze tones in cool weather/fall

Flowers and fruit
Small white flowers (strawberry-like) produced sporadically late spring to early summer; Small bright golden to salmon or scarlet aggregate fruits. Edible but mild flavor.
Attractive to birds

Bark
Not stated

HEALTH

Health
Generally pest-free. Deer resistant. No serious problems stated. Root rot possible only in poorly drained sites

Symptoms
None stated
