QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Herbaceous perennial

Growth & Size
Rate: Not stated
Size: 2–3 ft (60–90 cm) tall × 2–3.5 ft (60–105 cm) wide.
Upright to open vase-shaped habit. Some 3–4 ft.
Deep taproot

Sun

Water

Soil
Average, dry to medium, well-drained.
Prefers acidic, somewhat poor soils. Adaptable

Zone 8a
Hardy Zones 4–8 (some to 9). Excellent for Atlanta Zone 8a.
Drought- and heat-tolerant once established.
Prefers full sun and well-drained soil

ORIGIN AND CHARACTERISTICS

Origin
Complex hybrid of native North American species.
Bred at Chicago Botanic Garden

Form
Herbaceous perennial. Upright, open, vase-shaped. Sturdy stems. Deep-rooted; do not disturb once established. Complex hybrid (*B. albescens*, *B. australis*, *B. leucophaea*, *B. tinctoria*). PrairieBlues series.
Distinctive color-changing flowers on the same spike

Foliage
Trifoliate, clover-like green leaves. Attractive

Flowers and fruit
Bicolor racemes: emerge creamy white / lemon-cream, mature to lavender-blue / violet. Pea-like, ~1 in diameter. Racemes to 15 in. April–May / late spring. Unique two- to three-toned effect.
Attracts butterflies; Showy seed pods. Gray to black.
Winter interest

Bark
Not woody

PLANTING NOTES

Establishment

Low maintenance. Plant permanently. May open after bloom; trim foliage if desired for shape (loses pods). Excellent focal plant, borders, prairies. Heat and humidity tolerant

HEALTH

Health

No serious insect or disease problems. Sensitive to juglone. Deer- and rabbit-resistant. Good disease resistance. Possible broom moth in warmer areas

Symptoms

None stated
