QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 18–36 in (45–90 cm) tall × 12–36 in (30–90 cm) wide.
Upright, dense clumps. Spreads slowly by rhizomes.
Taller (up to 3 ft) in wet condition

Sun

Water

Soil
Acidic preferred. Moist to wet, loose. Tolerates clay, loam, sand, rich. Good drainage in wet settings or bog tolerance

Zone 8a
Hardy Zones 6–11. Suitable for Atlanta Zone 8a. Prefers moist to wet sites. Good for water features or irrigated beds. Heat and humidity tolerant in appropriate moisture

PLANTING NOTES

Establishment
Low to medium maintenance. Divide clumps in spring. Excellent for bog gardens, pond edges, water gardens, containers, rain gardens. Tolerates inundation. Mulch or keep moist

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of species native to New Zealand, Australia, and southeast Asia. Wetland margins, swamps

Form
Evergreen perennial sedge/rush. Rigidly upright, clumping. Grass-like. Slow-spreading colonies via scaly rhizomes. Ornamental for water gardens and wet areas

Foliage
Narrow, needle-like to tubular, stiff upright blades. Deep green with yellow/gold striping along one edge. Evergreen. Dense basal clumps

Flowers and fruit
Insignificant. Brown to reddish-brown nut-like fruits/spikelets. Not showy

Bark
Not applicable

HEALTH

Health
Deer-resistant. Generally low pest and disease issues. Verticillium wilt resistant noted in some . No serious problems stated when properly sited. Humidity tolerant

Symptoms
None stated
