## QUICK FACTS

Plant Type: Shrub

**Evergreen or deciduous**
Evergreen

**Growth & Size**
Rate: Not stated
Size: 2–3 ft (0.6–0.9 m) high × 2–3 ft (0.6–0.9 m) wide.
Upright, bushy woody sub Semi-

**Sun**

**Water**

**Soil**
Average, dry to medium, well-drained soils.
Sharp drainage preferred

**Zone 8a**
Hardy in USDA Zones 7–10 (or 6–9). Excellent for Atlanta Zone 8a. Long-blooming (spring to frost) lipstick-red / coral-red flowers with white throats. Extremely heat and drought tolerant. Attracts hummingbirds. Deer resistant. Continuous bloom in the South

## ORIGIN AND CHARACTERISTICS

**Origin**
Cultivar of Salvia greggii (autumn sage), native to Texas and northern Mexico. Selected for continuous bloom and lipstick-red color with white throat. One of the longest-flowering and best-performing Texas sage cultivars in trials

**Form**
Semi-evergreen subshrub. Small aromatic green leaves. Two-lipped reddish-pink to lipstick-red flowers with white throats, borne continuously from spring through fall. Upright bushy habit. Attracts hummingbirds and pollinators. Deer resistant. One of the longest-blooming S. greggii selections. Lipstick-red flowers with white throats. Continuous color from spring to frost in the South. Hummingbird magnet.
Extremely heat tolerant. Excellent for Atlanta
