QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Herbaceous perennial

Growth & Size
Rate: Not stated
Size: 2–3 ft (0.6–0.9 m) tall; 2–5 ft (0.6–1.5 m) wide.
Upright to mounded clump. Slow to establish; deep roots.
Mid- range of reported figures

Sun

Water

Soil
Average, dry to medium, well-drained soil. Drought and poor-soil tolerant. Deep root system; do not disturb once established

Zone 8a
USDA Zones 5–8. Native to south-central U.S..
Suitable for Atlanta Zone 8a. Deciduous perennial

ORIGIN AND CHARACTERISTICS

Origin
Species native to open habitats along the Gulf Coast (Texas to Mississippi) north through Oklahoma and Arkansas to Missouri. Cultivar ‘Screamin’ Yellow’ is an Arkansas selection by Larry Lowman, noted for profuse bloom and larger yellow-green leaves. Native to the southeastern U.S

Form
Herbaceous perennial. Clover-like trifoliate leaves, blue-green to yellow-green. Bright yellow pea-like flowers in erect racemes (12–15 in) in late April–May. Inflated spherical seed pods (to 0.75 in) turn tan/brown. No notable fall color or bark. Particularly noted for profuse bright yellow bloom. Seed pods ornamental and useful in dried arrangements. Selection from native Arkansas material

Foliage
Not stated

Flowers and fruit

PLANTING NOTES

Establishment

Low maintenance. Do not transplant once established (deep roots). Shear after bloom to maintain form if desired (removes some seed pods). Suitable for borders, rain gardens, and native plantings. Slow to establish but durable

HEALTH

Health

No serious pests or diseases stated. Deer resistant. Long-lived once established. Attracts butterflies and bumblebees

Symptoms

None stated
