QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Clumping perennial

Growth & Size
Rate: Not stated
Size: 3–4 ft (0.9–1.2 m) high × 2.5–3.5 ft (0.8–1.1 m) wide.
Clumping herbaceous perennial.
Spreads slowly by rhizomes

Sun

Water

Soil
Average, medium to wet, well-drained soils

Zone 8a
Hardy in USDA Zones 4–9. Excellent for Atlanta Zone 8a. Native selection with arching sprays of bright yellow flowers in late summer to fall that resemble fireworks. Heat and humidity tolerant. Attracts pollinators and butterflies. Less aggressive than the species. Excellent late-season color. Plant of Merit

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of native Solidago rugosa (rough goldenrod). Selected at the North Carolina Botanical Garden by Ken Moore and introduced in 1993 from a coastal plain population. Top-rated in Chicago Botanic Garden goldenrod trials.
Less invasive than the species

Form
Clumping perennial. Dark green wrinkled leaves. Dense plume-like panicles of tiny bright yellow flowers on arching stems in late summer to fall. Upright habit. Attracts butterflies, bees, and other pollinators. Dried seed heads provide winter interest. Spreads slowly. Top-rated goldenrod selection. Arching yellow "fireworks" flower sprays. Native parent. Excellent for Atlanta. Attracts pollinators. Less invasive than the species. Outstanding late-summer and fall color

PLANTING NOTES

Establishment

Plant in full sun with average to moist well-drained soil. Excellent for borders, meadows, rain gardens, and pollinator plantings. Divide every few years if desired. Leave stems for winter interest and native bee nesting.
Low maintenance. Outstanding late-season performer

HEALTH

Health

Generally pest- and disease-free. Heat and humidity tolerant. Attracts pollinators. Deer resistant. Less aggressive spread than the species. Occasional rust or mildew possible but not dominant. No serious problems stated as dominant

Symptoms

None stated
