FLOWER

QUICK FACTS

Plant Type: Deciduous shrub

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: 5–8 ft (1.5–2.5 m) tall; 4–7 ft (1.2–2 m) wide. Dense, rounded habit.
Smaller than typical f. plicatum

Sun

Water

Soil
Moist, well-drained soils preferred. Tolerates a wide range of soils and has good drought tolerance once established. Prefers loams

Zone 8a
Excellent for Atlanta Zone 8a. Heat tolerant with adequate moisture. Outstanding spring floral display with popcorn-like white clusters. Attractive fall color. Ideal for screens, hedges, and specimen use. Low maintenance. Attracts butterflies

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of a species native to China and Japan (f. tomentosum is the wild form)

Form
Round, multi-stemmed deciduous shrub with dense, rounded habit. Horizontal branching tendency

Foliage
Ovate, toothed, strongly-veined, dark green leaves with pleated upper surfaces. Turns burgundy red to purplish red in fall

Flowers and fruit
Small, rounded, popcorn-like clusters (2–3 in diameter) of bright white sterile flowers. Profuse spring bloom (late April–May), earlier than most other f. plicatum cultivars. Almost overwhelms the foliage. No subsequent fruit (sterile form)

Bark
Not stated

HEALTH

Health
Generally pest- and disease-free. No serious problems stated. Fruit (when present on fertile forms) ornamental, not for consumption. Monitor for typical viburnum pests under stress

Symptoms
None stated
