QUICK FACTS

Plant Type: Evergreen conifer shrub

Evergreen or deciduous
Suitable for Atlanta Zone 8a with good culture (hardy to Zone 6). Benefits from protection from intense afternoon sun and consistent moisture in summer. Outstanding compact evergreen accent or foundation plant. Excellent year-round green color and silver undersides. Low maintenance. Slow growth is an advantage in small spaces

Growth & Size
Rate: Not stated
Size: 1–2 ft (30–60 cm) tall; 2–4 ft (60–120 cm) wide after 10 years., dwarf, spreading, mounded to flat-topped form. Eventually larger but remains compact

Soil
Well-drained, average soils

Zone 8a
Suitable for Atlanta Zone 8a with good culture (hardy to Zone 6). Benefits from protection from intense afternoon sun and consistent moisture in summer. Outstanding compact evergreen accent or foundation plant. Excellent year-round green color and silver undersides. Low maintenance.
Slow growth is an advantage in small spaces

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of a species native to Japan. Introduced to Western trade in the early 1860s by Veitch & Sons

Form
Low, dense, rounded to spreading bun-shaped mound with upward-pointed sprays of foliage. Compact dwarf selection

Foliage
Flat, thick, scale-like, overlapping leaves. Shiny dark to medium green above with distinct silvery-white stomatal stripes underneath. Remains bright green year-round.
Finer textured than the species

Flowers and fruit
