QUICK FACTS

Plant Type: Shrub

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 6–10 ft (1.8–3 m) high × 8–10 ft (2.4–3 m) wide.
Large, broadly rounded, open-bra

Sun

Water

Soil
Moist but well-drained, acidic, organically rich soil

Zone 8a
Hardy in USDA Zones 4–8 (or 5–8). Suitable for Atlanta Zone 8a in shaded, acidic sites. Late-blooming (mid to late spring into early summer) lavender-pink trusses. Large leathery evergreen foliage. Excellent for woodland naturalizing or large shady borders. Native parentage

ORIGIN AND CHARACTERISTICS

Origin
Selection of Rhododendron maximum (Rosebay Rhododendron), native to eastern North America. 'Roseum' features pink flowers and vigorous growth. Long-grown variety valued for late bloom and size in shaded landscapes

Form
Large evergreen shrub with long, deep green, strap-like leathery leaves. Huge clusters (up to 25 blooms) of lavender-pink to rosy lilac flowers in late spring to early summer (later than most rhododendrons). Loosely arranged on wide-spreading open branches. Evergreen year-round. Attracts butterflies and hummingbirds. Large native-derived evergreen with spectacular late lavender-pink flower clusters. Excellent for shady Atlanta landscapes. Big foliage and open branching. Long-lived once established. Attracts pollinators

Foliage

Bark
Not stated

PLANTING NOTES

Establishment

Plant in part to full shade with moist, acidic, well-drained, organic soil. Mulch to keep roots cool. Water to establish. Excellent for large woodland areas, naturalizing, or as a substantial evergreen screen. Late bloom extends the rhododendron season. Minimal pruning after flowering

HEALTH

Health

Generally low maintenance when properly sited. Requires acidic soil to avoid chlorosis. Protect from winter winds. Rabbit resistant. Attracts pollinators. No serious problems stated as dominant in suitable conditions

Symptoms

None stated
