FLOWER / FRUIT

QUICK FACTS

Plant Type: Shrub

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: Dense, compact, upright to mounded habit. Young plants ~60 cm (2 ft) tall × 90–120 cm (3–4 ft) wide. Spreads by rhizomes; ultimate width can exceed 120 cm. Suitable as low mass planting or groundcover ~60 cm or less

Sun

Water

Soil
Well-drained preferred. Tolerates sand, clay, alkaline, road salt. Prefers slightly acidic, organic-rich. Wide adaptability

Zone 8a
Hardy Zones 3–8 (or 9). Suitable for Atlanta Zone 8a. Heat and drought tolerant once established. Good fall color and wildlife value

PLANTING NOTES

Establishment
Prune to thin older stems every few years if needed. Excellent for mass plantings, low hedges, facer plants.
Performs well in challenging sites once established

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of *Aronia melanocarpa*, native to eastern North America. University of Connecticut breeding program release

Form
Deciduous shrub. Very dense, compact, mounded. Rhizomatous spreader. UConn compact selection. Spreads by rhizomes

Foliage
Lustrous dark green summer foliage. Fall color red, orange, yellow. Glossy, elliptic to obovate leaves

Flowers and fruit
Clusters of white (sometimes pink-tinged) five-petaled flowers in spring. Attracts pollinators; Black berries.
Edible (tart). Attracts birds. Persists into winter

Bark
Not prominently noted

HEALTH

Health
Generally no major pest or disease problems.
Highly adaptable and hardy. Low maintenance

Symptoms
None stated
