QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: 6–10 ft (1.8–3 m) high × 6–10 ft (1.8–3 m) wide

Sun

Water

Soil
Acidic, well-drained, moist soil (clay, sand, loam).
Low salt tolerance

Zone 8a
Hardy in USDA Zones 7–10a (or 5–9). Suitable for Atlanta Zone 8a. Bred for heat and humidity of the coastal South. Abundant yellow flowers with golden-orange splash. Fragrant. Low maintenance

ORIGIN AND CHARACTERISTICS

Origin
Aromi hybrid native azalea. Bred by Dr. Eugene Aromi (University of South Alabama) for heat and humidity tolerance in the South. Combines native Florida azalea traits with larger-flowered hybrids. Fragrant yellow blooms

Form
Deciduous native hybrid azalea. Large rounded clusters of dazzling yellow flowers with splash of golden-orange on upper petals. Strongly fragrant. Blooms in spring with new foliage. Has the look of Exbury azaleas (parentage). Attractive to pollinators. Aromi hybrid selected for southern heat/humidity performance. Large yellow flower clusters with orange splash. Strongly fragrant. Deciduous. Combines native toughness with showy hybrid flowers

PLANTING NOTES

Establishment

Plant in part sun to part shade with acidic, well-drained, moist soil. Minimal pruning (after flowering). Excellent for borders, mass plantings, containers, specimens, or naturalized areas. Fragrant spring blooms. Attracts pollinators.
Low maintenance

HEALTH

Health

Insect and disease resistant when properly sited. Low maintenance. Generally trouble-free. Prune after flowering if needed to avoid removing next year's buds

Symptoms

None stated
