QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 10–15 ft tall, 6–8 ft wide. upright

Sun

Water

Soil
Prefers moist, well-drained soil; tolerates a range of pH. Avoid poorly drained sites

Zone 8a
Hardy in Zones 7–11. Well suited to Atlanta Zone 8a. Foliage may be damaged below about 10°F

PLANTING NOTES

Establishment
Plant in full to part sun on well-drained soil. Prune after flowering if shaping as hedge. Can be trained as a small multi-trunk tree

ORIGIN AND CHARACTERISTICS

Origin
Species native to India, Burma, China, Japan, Philippines. Cultivar ‘Chindo’ collected by J.C. Raulston on Chindo Island, South Korea, in 1985

Form
Evergreen (semi-evergreen near northern range limit). Dense upright pyramidal habit. Large glossy dark green leathery leaves. White fragrant flowers in late spring; red berries ripening to black. Excellent for screening and hedges. Fast growth and glossy foliage distinguish it from related species. Selected for large red fruit clusters
