QUICK FACTS

Plant Type: Small tree or large shrub

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: 10–15 ft. Confirmed by multiple × 8–15 ft. Confirmed range

Sun

Water

Soil
Well-drained, slightly acidic to neutral. Rich preferred

Zone 8a
Suitable for Zone 8a. Hardy Zones 6–9. Japanese maples generally perform in Atlanta with afternoon shade and consistent moisture. Leaf scorch risk in full sun and dry conditions. NC State confirms Japanese maple group prefers dappled shade and even moisture. [

PLANTING NOTES

Establishment
Plant in full sun to part shade (afternoon shade preferred in Zone 8a) in moist, well-drained, slightly acidic soil. Water regularly, especially during establishment and dry periods. Prune in dormancy if needed.
Suitable for containers or specimen use

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Acer palmatum. Synonyms include 'Filiferum Purpureum', 'Linearilobum Rubrum'.
Selection history not detailed by reviewed

Form
Deciduous small tree or large shrub.
Dense, upright to rounded. Slow growth

Foliage
Red and orange

Flowers and fruit
Not stated

Bark
Not stated in detail

HEALTH

Health
Typical Japanese maple issues: leaf scorch in dry/hot conditions, occasional insects. No serious problems uniquely stated. Low maintenance when sited correctly.
Specific cultivar health data is thin

Symptoms
None stated
