QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: Medium to large (species hybrid typically to ~20 m / 65 ft). Broad canopy. Growth rate and exact mature size for this cultivar not fully detailed in available ; inherits vigor from parents

Sun ☼

Water ●●○○○

Soil
Adaptable soils. Combines resilience of willow oak and Shumard oak parents

Zone 8a
Hybrid of southeastern-adapted parents (willow oak and Shumard oak). Suitable for Atlanta Zone 8a. Elongated willow-like leaves; yellow to red fall color. Broad canopy provides shade. Wildlife value from acorns

ORIGIN AND CHARACTERISTICS

Origin
Hybrid of Quercus phellos (willow oak) × Quercus shumardii (Shumard oak). Cultivar 'Dragon's Tongue' selected for distinctive foliage and form. Combines traits of both parents. Native hybrid range in the southeastern U.S.
where parents overlap

Form
Deciduous hybrid oak with broad canopy. Leaves elongated and willow-like (2–6 in), dark green. Fall color vivid yellow to red. Bark smooth grayish-brown when young, becoming darker and ridged with age. Elongated acorns (~1 in). Selected for ornamental qualities. Hybrid combining willow oak leaf form with Shumard oak traits. Elongated leaves and good fall color. Useful shade tree. Limited cultivar-specific data available; based primarily on hybrid characteristics

PLANTING NOTES

Establishment

Plant in full sun with well-drained soil. Broad shade tree. Fall color is a feature. Suitable for landscapes where hybrid vigor and intermediate leaf form are desired.
Long-lived. Minimal special care

HEALTH

Health

No serious problems stated. Inherits toughness from both parents. Generally adaptable and resilient.
Acorns provide wildlife food

Symptoms

None stated
