QUICK FACTS

Plant Type: Small tree or large shrub

Evergreen or deciduous
Semi-evergreen

Growth & Size
Rate: Not stated
Size: 20–30 ft tall × 20–30 ft wide in cultivation.
Small to semi- or multi-stemmed

Sun

Water

Soil
Rich, moisture-retentive but well-drained soils; acid preferred. Shelter from cold winds

Zone 8a
Hardy USDA zones 7–10 (best in 8+). Evergreen in warmer climates leaves may drop below 20°F. Suitable for Atlanta Zone 8a; performs well in the southeastern United States

PLANTING NOTES

Establishment
Low maintenance. Propagate by seed or cuttings. Suitable for woodland gardens, containers, bonsai

ORIGIN AND CHARACTERISTICS

Origin
Native to central and southern China and Vietnam.
Not native to North America

Form
Small evergreen to semi-evergreen tree or shrub. Unlobed, lance-shaped to oblong glossy dark green leaves (4–11 cm); new growth reddish. Brownish-yellow to red-winged samaras. Dark brown to gray bark; bright purple-red when young. No deciduous fall color (evergreen). Rare in cultivation outside native range. Valued for glossy evergreen foliage and winter interest
