QUICK FACTS

Plant Type: Tree

Evergreen or deciduous
Native to eastern North America including Georgia. Species listed for Atlanta planting recommendations and performs in Zone 8a–9. Cultivar selected in Georgia (Bold Spring Nursery, Hawkinsville) and observed in SE landscapes with reliable bright red fall color. Explicit Zone 8a performance: Not stated for this cultivar beyond species adaptability, but Georgia origin supports suitability

Growth & Size
Rate: Not stated
Size: Pyramidal form reaching about 50 ft tall and 25 ft wide at maturity.
Mid-range used where vary

Sun

Water

Soil
Prefers moist, acidic, well-drained soils but adaptable to wet or dry sites once established. Tolerates clay and urban conditions

Zone 8a
Native to eastern North America including Georgia. Species listed for Atlanta planting recommendations and performs in Zone 8a–9. Cultivar selected in Georgia (Bold Spring Nursery, Hawkinsville) and observed in SE landscapes with reliable bright red fall color. Explicit Zone 8a performance: Not stated for this cultivar beyond species adaptability, but Georgia origin supports suitability

ORIGIN AND CHARACTERISTICS

Origin
Cultivar selection of the native Nyssa sylvatica (eastern US). Garden origin / hybrid selection.
Not native as a named cultivar

Form
Strongly pyramidal tree form with broad branch angles and freely branching habit producing a full, densely foliated appearance. Large glossy medium-green leaves turn uniformly bright red in autumn. Vaguely ridged and furrowed bark. Male flowers only (seedless). Vigorous growth. Only male flowers observed; no fruit. Excellent for street trees or specimens where fall color is desired. Selected by John Barbour, Bold Spring Nursery, Georgia

Foliage
Not stated

Flowers and fruit

Bark
Not stated

PLANTING NOTES

Establishment

Difficult to transplant due to taproot; plant young containerized specimens. Shelter from cold, dry winds. Low maintenance once established. Tolerates standing water short-term and drought

HEALTH

Health

Generally pest and disease resistant like the species. Leaf spot can occur on some Nyssa but this cultivar noted for consistent fall color. No serious problems stated specifically

Symptoms

None stated
