QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: 20–50 ft tall and wide.
Medium-sized with open-rounded crown

Sun

Water

Soil
Tolerates dry to medium soils, including alkaline, sandy, and rocky

Zone 8a
Hardy in Zones 6–9. Suitable for Atlanta Zone 8a

PLANTING NOTES

Establishment
Plant in full sun on well-drained soil. Drought tolerant after establishment. Fruit can be messy over patios or walks

ORIGIN AND CHARACTERISTICS

Origin
Native to southwestern United States and northern Mexico

Form
Deciduous. Leaves pinnately compound, 8–18 leaflets, glossy medium green. Fall color yellow. Flowers yellowish-white in terminal clusters, May–June. Fruit yellow-orange to black drupes that persist into winter; toxic if ingested. Bark gray, divided into scaly plates. Fruits historically used as soap (saponins). Good urban tolerance. Clear yellow fall color
