QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Hardy USDA Zones 6–9. Suitable for Atlanta Zone 8a with good drainage. Heat and drought tolerant. May need monitoring for suckering in rich soils. Not stated as problematic in Zone 8a

Growth & Size
Rate: Not stated
Size: or, typically 12–20 ft tall (occasionally to 25–30 ft) × 10–20 ft wide.; may form colonies by suckering

Sun

Water

Soil
Well-drained soils, prefers limestone or neutral to alkaline

Zone 8a
Hardy USDA Zones 6–9. Suitable for Atlanta Zone 8a with good drainage. Heat and drought tolerant. May need monitoring for suckering in rich soils. Not stated as problematic in Zone 8a

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Native to southern Oklahoma, Texas, New Mexico, and into Mexico. Not native to Georgia but adaptable

Form
Loose, spreading, upright/erect to oval crown.
Often multi- stemmed or thicket-forming

Foliage
Pinnately compound leaves (narrower than related sumacs), shiny green, brilliant orange to red (sometimes yellow) fall color.
Winged rachis typical of the group

Flowers and fruit
Yellowish-white to cream terminal panicles in summer. Followed by dense clusters of red hairy drupes on female plants that persist and attract birds

Bark
Not stated

HEALTH

Health
Generally pest- and disease-free.
No serious problems stated. Heat and drought tolerant

Symptoms
None stated
