Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: 6–15 ft (1.8–4.5 m) high × 6–12 ft (1.8–3.7 m) wide.
or Often suckering

Sun

Water

Soil
Average, well-drained to moist soils. Prefers sandy soils. Tolerates a range of conditions. Good drainage preferred

Zone 8a
Hardy in USDA Zones 7–9. Excellent for Atlanta Zone 8a. Native southeastern understory shrub or small tree. Larger leaves than Styrax americanus. White bell-shaped flowers in racemes in spring. Heat tolerant. Attracts pollinators.
Good for woodland edges and upland sites

ORIGIN AND CHARACTERISTICS

Origin
Native to the southeastern United States, from Virginia to Florida and west to Texas and Missouri. Found in upland woods, ravines, and rocky banks. Closely related to Styrax americanus but prefers drier sites. IUCN Least Concern

Form
Deciduous multi-stemmed shrub or small tree. Large obovate to elliptic leaves, often densely pubescent beneath. Racemes of white bell-shaped flowers in spring. Globose pubescent fruits. Often forms thickets by suckering. Attracts bees and butterflies. Native bigleaf snowbell. Larger leaves and more suckering than Styrax americanus. White spring flowers. Excellent heat tolerance. Attracts pollinators.
Good for upland woodland sites in Atlanta
