QUICK FACTS

Plant Type: Deciduous conifer tree

Evergreen or deciduous
Well suited to Atlanta Zone 8a. Heat tolerant. Outstanding unique weeping form for specimen use near water or in gardens. Soft texture and strong fall color. Low maintenance once established. Does not produce viable seed

Growth & Size
Rate: Not stated
Size: 8–20 ft (2.5–6 m) tall depending on graft height; 5–12 ft (1.5–3.5 m) wide.
Compact weeping form.
Eventually to ~20 ft if trained

Sun

Water

Soil
Moist to wet soils preferred; tolerates average once established. Adaptable to a range of soils

Zone 8a
Well suited to Atlanta Zone 8a. Heat tolerant. Outstanding unique weeping form for specimen use near water or in gardens. Soft texture and strong fall color. Low maintenance once established. Does not produce viable seed

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of a species native to the southeastern United States.
Discovered in Albany, Auckland, New Zealand.
Selected by Noeline & David Sampson

Form
Strongly pendulous, waterfall-like habit. Branches hang outward then plunge vertically. Typically grafted onto standard understock at desired height. If not supported, can sprawl as groundcover

Foliage
Soft, feathery, linear, yellowish-green to dark green needles. Turns attractive orange/cinnamon-brown to reddish-brown in fall. Deciduous

Flowers and fruit
Not stated

Bark
Reddish-brown, fibrous, exfoliating with age

HEALTH

Health
Generally pest- and disease-free when grown in proper conditions. No serious problems stated

Symptoms
None stated
