QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Species native to Georgia and SE US. Cultivar selected in Tennessee (Hidden Hollow Nursery) and observed in SE gardens (Dirr notes on fall color performance in Georgia). Performs well in Zone 8a landscapes. Explicit long-term Atlanta data: Not stated beyond regional observations and species suitability

Growth & Size
Rate: Not stated
Size: 40–50 ft tall by 20–30 ft wide. Some list up to 50–60 ft.
Mid-range ~45 ft × 25 ft used

Sun

Water

Soil
Adaptable to a wide range of soils including wet; prefers moist, acidic, well-drained

Zone 8a
Species native to Georgia and SE US. Cultivar selected in Tennessee (Hidden Hollow Nursery) and observed in SE gardens (Dirr notes on fall color performance in Georgia). Performs well in Zone 8a landscapes. Explicit long-term Atlanta data: Not stated beyond regional observations and species suitability

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of native Nyssa sylvatica selected by Alex Neubauer, Hidden Hollow Nursery, Tennessee. Garden origin

Form
Upright pyramidal / gable-shaped canopy with upsweeping branches and dominant central leader; uniform branching. Dark green glossy summer foliage; brilliant orange-red to red fall color. Male selection (few or no fruit). Improved leaf-spot resistance. Bark develops furrowed alligator-hide texture with age. Pennsylvania Horticultural Society Gold Medal 2023. Seedless/male. Fast-growing relative to species with strong structure. Discovered 2002

Foliage
Not stated

Flowers and fruit
Not stated

Bark
Not stated

PLANTING NOTES

Establishment

Plant young; taproot makes transplanting difficult. Low maintenance. Excellent street tree candidate due to form. Tolerates urban conditions, wet soils, drought

HEALTH

Health

No serious insect or disease problems. Noted leaf-spot resistance compared to typical seedlings.
Occasional leaf spot possible but foliage cleaner

Symptoms

None stated
