QUICK FACTS

Plant Type: Tree

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: Approximately 18–22 ft at 4–10 years; projected taller with fastigiate form (species 50–80+ ft)

Sun

Water

Soil
Adaptable to a range of well-drained soils; prefers acidic, moist

Zone 8a
Species hardy Zones 3–9. Cultivar from Georgia; suitable for Atlanta Zone 8a. Fastigiate form useful in tighter spaces. No cultivar-specific Zone 8a notes beyond species performance

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Quercus alba, native to eastern North America. Selection discovered as a seedling in Washington, Georgia

Form
Deciduous tree with unique upright, fastigiate structure and central leader. Suitable for commercial digging/transplanting

Foliage
Deeply lobed leaves, deep green with somewhat blue hue. Species fall color reddish-brown

Flowers and fruit
Insignificant catkins in spring.
Acorns typical of white oak group (species)

Bark
Not stated

HEALTH

Health
Species potential issues: oak wilt, anthracnose, oak leaf blister. Cultivar noted for transplant suitability; no unique problems stated

Symptoms
None stated
