PLANTING NOTES

Establishment
- Soak tubers overnight before planting. Plant 2–3 in deep and 3–5 in apart in fall. Keep moist during growing season

ORIGIN AND CHARACTERISTICS

Origin
- Cultivar of Anemone blanda, which is native to southeastern Europe to the Caucasus and Turkey.
- Not native to North America

Form
- Spreading, tuberous-rooted perennial. Low-growing. Forms a mat

Foliage
- Deeply cut, fern-like foliage. Dies back after flowering

Flowers and fruit
- Intense blue, daisy-like flowers (2.5 in diameter) with 9–14 showy sepals. April. Excellent cut flower.
- Self-sows; seedlings bloom the second year

Bark
- Not applicable (herbaceous)

HEALTH

Health
- Low severity poison characteristics for the genus. - Leaf spot and rhizome rot infrequently reported. - Deer tolerant

Symptoms
None stated
