QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: Height: 8–12 in. (20–30 cm); cite ½–1 ft or 20–25 cm.
Spread: 4–6 in. (10–15 cm). [RHS] [Missouri Botanical Garden] [White Flower Farm]

Sun

Water

Soil
Well-drained soils (chalk, loam, sand). Acid to alkaline/neutral. Free-draining essential. [RHS] [Missouri Botanical Garden]

Zone 8a
Hardy in USDA Zones 3–8. Suitable for Atlanta Zone 8a. As a clusiana-type / Division 15 tulip it is more likely to perennialize and return reliably in free-draining soil than many large hybrid tulips. [RHS] [Missouri Botanical Garden] [White Flower Farm]

ORIGIN AND CHARACTERISTICS

Origin
Cultivated hybrid related to Tulipa clusiana (Lady Tulip). Horticultural origin. [RHS] [White Flower Farm] [Garden.org]

Form
Bulbous perennial. Small hybrid / species-type tulip (Division 15 / Miscellaneous). Slender habit. Deciduous. Offspring of Tulipa clusiana. [RHS] [Missouri Botanical Garden] [White Flower Farm]. Compact, bicolor species-type tulip. Flowers open into star shapes on sunny days. More perennial than most hybrid tulips. [White Flower Farm] [RHS]

Foliage
Linear, narrow green leaves. [Missouri Botanical Garden]

Flowers and fruit
Not stated

Bark
Not applicable (bulbous perennial)

PLANTING NOTES

Establishment

Plant bulbs in autumn in well-drained soil in full sun. Ideal for rockeries, gravel gardens, borders, and containers. Naturalizes well. Leave undisturbed once established. Propagate by offsets. [RHS] [Missouri Botanical Garden] [White Flower Farm]

HEALTH

Health

Bulb and root rots may occur in wet, poorly drained soils. Otherwise generally problem-free when drainage is good. Harmful if eaten (typical of tulips). [Missouri Botanical Garden] [RHS]

Symptoms

None stated
