QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Marginal for Atlanta Zone 8a. Hardy Zones 4–8. Missouri Botanical Garden notes plants do not perform well in the deep South (south of Zone 7). Prefers part shade and consistently moist soil. Foliage may burn in hot, dry, sunny conditions. Not stated for specific Atlanta tri

Growth & Size
Rate: Not stated
Size: - 3–4 ft tall × spreads by rhizomes

Sun

Water

Soil
- Evenly moist, well-drained, organically rich soil.
Avoid wet soils, especially in winter

Zone 8a
Marginal for Atlanta Zone 8a. Hardy Zones 4–8. Missouri Botanical Garden notes plants do not perform well in the deep South (south of Zone 7). Prefers part shade and consistently moist soil. Foliage may burn in hot, dry, sunny conditions. Not stated for specific Atlanta trials

ORIGIN AND CHARACTERISTICS

Origin
- Hybrid of garden origin. Discovered in Verdun, France in 1858 as a sport. - Not native to North America

Form
- Mounding, compact herbaceous perennial.
Spreads by creeping rhizomes. May be slow to establish

Foliage
- Trifoliate dark green leaves. Attractive foliage mound.
- Deciduous to semi-evergreen

Flowers and fruit
- Single white flowers (2–3 in diameter) with 6–9 overlapping petaloid sepals and yellow center stamens.
August–September. Award of Garden Merit

Bark
- Not applicable (herbaceous perennial)

PLANTING NOTES

Establishment
- Plant in organically rich, moist, well-drained soil in part shade. Protect from wind. Winter mulch in cold climates. Divide or take root cuttings to propagate

HEALTH

Health
- No serious insect or disease problems stated. Deer tolerant

Symptoms
None stated
