FLOWER

QUICK FACTS

Plant Type: Herbaceous perennial

Evergreen or deciduous
Deciduous (herbaceous)

Growth & Size
Rate: Moderate
Size: 2–3 ft × 1–2 ft

Sun

Water

Soil
Average, well-drained; adaptable (clay to sand)

Zone 8a
Excellent suitability for Atlanta Zone 8a. Heat and humidity tolerant. Long bloom period in full sun. Reliable and low-maintenance. Performs as well in the South as in northern climates

PLANTING NOTES

Establishment
Plant in full sun, well-drained soil. Deadhead for continued bloom or leave seed heads. Divide every few years. Excellent for borders, meadows, pollinator gardens

ORIGIN AND CHARACTERISTICS

Origin
Selection of native Rudbeckia fulgida (introduced 1937)

Form
Upright, clump-forming; may slowly colonize. 1999 Perennial Plant of the Year. RHS AGM. consistent on size and hardiness

Foliage
Dark green lanceolate leaves

Flowers and fruit
Prolific golden-yellow daisy-like flowers with dark brown/black centers, mid-summer to fall. Seed heads attractive to birds

Bark
N/A

HEALTH

Health
Generally pest and disease free. Deer mostly resistant. No serious problems stated. Low maintenance

Symptoms
None stated
