QUICK FACTS

Plant Type: Deciduous to semi-evergreen ornamental grass

Evergreen or deciduous
Well adapted to Atlanta Zone 8a (hardy Zones 7–10). Excellent heat and drought tolerance. Outstanding for movement and fine texture in borders, mass plantings, and dry gardens. Low maintenance. Note: can self-seed vigorously; monitor in managed landscapes. Not considered highly invasive in the Southeast

Growth & Size
Rate: Not stated
Size: 1–2 ft (30–60 cm) tall; similar width. Compact upright tuft / fountain form.
Flowering stems to about 2+ ft

Sun

Water

Soil
Well-drained, lean to average soils (sandy, loamy preferred)

Zone 8a
Well adapted to Atlanta Zone 8a (hardy Zones 7–10). Excellent heat and drought tolerance. Outstanding for movement and fine texture in borders, mass plantings, and dry gardens. Low maintenance. Note: can self-seed vigorously; monitor in managed landscapes. Not considered highly invasive in the Southeast

ORIGIN AND CHARACTERISTICS

Origin
Native to southwestern US (Texas), Mexico, and parts of Central/South America

Form
Dense, upright to arching, fountain-like clumps of fine foliage. Airy, swaying habit

Foliage
Thread-like, fine, stiff, light green to silvery-green leaves. Turns buff/tan in late summer/fall.
Semi-evergreen in mild climates

Flowers and fruit
Not stated

Bark
Not stated
