QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Grown as an annual. Performs well in Atlanta Zone 8a summer heat and humidity. (Ball Seed Wave series notes, general Wave performance data)

Growth & Size
Rate: Not stated
Size: Trailing/spreading annual, typically 5–7 in tall and 36–48 in wide (Wave series standard). Mid-range ~6 in tall × 3–4 ft wide.
Cultivar- specific size data limited

Sun ☼

Water 💧💧○○○

Soil
Average, well-drained soils

Zone 8a
Grown as an annual. Performs well in Atlanta Zone 8a summer hea and humidity. (Ball Seed Wave series notes, general Wave performance data)

PLANTING NOTES

Establishment
Full sun. Space to allow spreading. Regular water and fertilizer for continuous bloom. No trimming required for continuous flowering along stems.
(Ball Seed Wave series culture)

ORIGIN AND CHARACTERISTICS

Origin
Hybrid petunia cultivar in the Wave series.
(Ball Seed / PanAmerican Seed Wave series)

Form
Low, ground-hugging spreading habit with masses of light pink flowers covering the plant from spring through frost. Dark green foliage. Cultivar-specific published data is limited. Characteristics follow the general Wave series pattern of low, spreading, heat-tolerant performance with continuous bloom. (Ball Seed Wave series data)

Foliage
Not stated

Flowers and fruit
Not stated

Bark
Not stated

HEALTH

Health
Generally low-maintenance. Wave series noted for better performance under heat and when botrytis is present compared with many other petunias. (Ball Seed culture information)

Symptoms
None stated
