QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Hardy USDA Zones 3–7. Suitable for Atlanta Zone 8a as a short-lived perennial or with self-seeding. Heat tolerant. May be shorter-lived in humid summers; allow reseeding for persistence.
Not stated as problematic

Growth & Size
Rate: Not stated
Size: Herbaceous perennial (short-lived / biennial tendency), 2–4 ft tall × 1–2 ft wide. Upright, clumping. May self-seed.
net (3–4 ft); Chicago Botanic Garc

Sun

Water

Soil
Average to medium moisture, well-drained soils. Tolerates clay. Deadhead to extend bloom

Zone 8a
Hardy USDA Zones 3–7. Suitable for Atlanta Zone 8a as a short-lived perennial or with self-seeding. Heat tolerant. May be shorter-lived in humid summers; allow reseeding for persistence.
Not stated as problematic

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Rudbeckia hirta, native to much of North America (including eastern and central US)

Form
Upright, coarse, hairy stems and foliage. Short-lived perennial often treated as annual in some climates

Foliage
Rough, hairy, lance-shaped green leaves. Dies back in winter

Flowers and fruit
Huge daisy-like flowers, 6–9 in diameter, bright golden-yellow rays surrounding dark chocolate-brown center disks. Bloom summer to frost. Excellent cut flower. Attracts butterflies, bees, and birds (seed heads). All-America Selections winner (1995); RHS Award of Garden Merit

Bark
Not stated

HEALTH

Health
Generally low maintenance. No serious insect or disease problems stated. Deer resistant.
Powdery mildew possible in poor air circulation. net

Symptoms
None stated
