FLOWER

QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Suitable for Atlanta Zone 8a. Herbaceous perennial with heat and drought tolerance. Not stated for specific Atlanta urban performance beyond general Zone 3–8/9 hardiness and tolerance of hot, humid summers

Growth & Size
Rate: Not stated
Size: - 1.5–2 ft tall and wide.
- Spreading, mat-forming habit

Sun

Water

Soil
Avoid rich, moist soils which cause flopping

Zone 8a
Suitable for Atlanta Zone 8a. Herbaceous perennial with heat and drought tolerance. Not stated for specific Atlanta urban performance beyond general Zone 3–8/9 hardiness and tolerance of hot, humid summers

ORIGIN AND CHARACTERISTICS

Origin
- Cultivar of Achillea millefolium, native to Europe, western Asia, and North America (Gardenia.net).
- Species is considered aggressive by some authorities

Form
- Spreading, mat-forming herbaceous perennial.
- Cultivar of Achillea millefolium or Galaxy Hybrid

Foliage
- Deeply dissected, fern-like, aromatic medium green foliage. - Strong, somewhat spicy aroma persists in dried arrangements

Flowers and fruit
- Tiny dusty-red flowers with yellow centers in dense, flattened compound corymbs (to 2–3 in across) from June to September. - Initial color fades to light pink, creamy yellow, and brown. - Attracts butterflies. - Good cut and dried flower

Bark
- Not applicable (herbaceous perennial)

PLANTING NOTES

Establishment

- Deadhead to extend bloom. Cut back after initial flowering to promote rebloom (Gardenia.net). - Divide clumps every 2–3 years in early spring. - Space 12–24 in apart (World of Flowering Plants)

HEALTH

Health

- No serious problems stated. Tolerates deer, drought, dry soil, and urban conditions. - Plants spread by rhizomes and self-seeding; divide every 2–3 years to maintain vitality.
- Deer and rabbit resistant

Symptoms

None stated
