QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Suitable for Atlanta Zone 8a. Compact yarrow with heat and drought tolerance. Not stated for specific Atlanta urban performance beyond general Zone 4–8 hardiness and tolerance of hot, humid summers

Growth & Size
Rate: Not stated
Size: - 9–12 in (0.75–1 ft) tall and wide. - Compact version of Achillea ‘Moonshine’

Sun

Water

Soil
Tolerates poor soils if drainage is good

Zone 8a
Suitable for Atlanta Zone 8a. Compact yarrow with heat and drought tolerance. Not stated for specific Atlanta urban performance beyond general Zone 4–8 hardiness and tolerance of hot, humid summers

PLANTING NOTES

Establishment
- Cut back after first flush for rebloom. - Propagate by division in spring. - Suitable for rock gardens, containers, and front of border

ORIGIN AND CHARACTERISTICS

Origin
- Compact version of Achillea ‘Moonshine’ (hybrid of A. clypeolata and A. ‘Taygetea’). - Not native to North America

Form
- Compact, clump-forming herbaceous perennial. - Bred by Har Stemkens of Syngenta Flowers; introduced by Must Have Perennials in 2015

Foliage
- Finely cut green-gray foliage. - Aromatic

Flowers and fruit
- Bright yellow flowers in flattened clusters from June to September. Clusters are as large as those of ‘Moonshine’ despite the smaller plant. - Blooms about two weeks earlier than ‘Moonshine’. Reblooms if cut back.
- Attracts butterflies. - Good cut and dried flower

Bark
- Not applicable (herbaceous perennial)

HEALTH

Health
- Tolerates deer, drought, dry soil, and urban conditions. - Does not flop due to compact habit.
- No serious problems stated

Symptoms
None stated
