QUICK FACTS

Plant Type: Shrub

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 2–3 ft (60–90 cm) tall × 1–2 ft (30–60 cm) wide typically; may spread 3–6 ft (90–180 cm) by rhizomes if unrestrained.
Bushy, mounding, woody-based p

Sun

Water

Soil
Poor to moderately fertile, dry to medium, well-drained. Tolerates chalk, loam, sand, clay (if well-drained). Prefers lean soils. Avoid wet or poorly drained

Zone 8a
Hardy Zones 6–9. Suitable for Atlanta Zone 8a with excellent drainage. May experience foliage decline in hot, humid summers. Drought-tolerant once established. Semi-evergreen

ORIGIN AND CHARACTERISTICS

Origin
Garden hybrid introduced from Powis Castle, Wales (1972). Mediterranean parentage

Form
Bushy, woody-based perennial or subshrub. Shrubby mound. Spreads by rhizomes. Evergreen in mild winters. Highly valued for silvery foliage contrast. Spreads by rhizomes

Foliage
Finely divided, silvery, fern-like, aromatic (feathery) foliage. Soft-textured, gray-green to silver. Primary ornamental feature. Year-round in warm climates

Flowers and fruit
Tiny yellow-tinged silver flowers, rarely bloom, insignificant. Grown for foliage

Bark
Not applicable (perennial subshrub)

PLANTING NOTES

Establishment

Prune back to lowest new shoots in mid to late spring. Can shear lightly in summer for shape. Do not cut to ground. Divide rhizomes. Excellent for contrast, gravel gardens, borders, xeriscapes. RHS AGM

HEALTH

Health

Susceptible to root rot in wet soils. Foliage may decline in hot, humid summers. Possible aphids, gall midge, honey fungus. Deer- and rabbit-resistant. No serious problems when well-drained

Symptoms

None stated
