FLOWER

QUICK FACTS

Plant Type: Herbaceous perennial

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Medium
Size: 17–24 in (43–61 cm) × 24–36 in (61–91 cm)

Sun

Water

Soil
Average to poor, well-drained; dry to medium moisture; pH acid to alkaline

Zone 8a
Suitable for Atlanta Zone 8a. Provide light afternoon shade in intense heat/humidity to prevent stress. Excellent drainage essential. Performs well with average water once established; low maintenance

PLANTING NOTES

Establishment
Plant in full sun to part shade, average well-drained soil. Shear after first flush to promote rebloom and compactness. Low fertilizer needs (overfeeding can cause flopping). Divide every few years if desired. Excellent for borders, edges, pollinator gardens, containers

ORIGIN AND CHARACTERISTICS

Origin
Hybrid (Nepeta racemosa × N. nepetella or similar); ‘Cat’s Meow’ bred by Kevin Hurd / Walters Gardens, introduced Proven Winners 2013 (PP24,472)

Form
Dense, rounded, spreading mound of decumbent to upright stems; keeps tidy habit. More compact and tidy than many Nepeta. Continuous bloom with shearing

Foliage
Small, aromatic, gray-green leaves; fragrant when bruised

Flowers and fruit
Dense spikes of sky-blue flowers with purple calyces from early summer into fall (May–Sept).
Attracts bees, butterflies, hummingbirds. Sterile or low-seed

Bark
N/A

HEALTH

Health
No serious pest or disease problems stated. Deer and rabbit resistant due to aromatic foliage. Tolerates drought, poor soil, urban conditions. Occasional minor issues possible in overly wet soils (root rot). No toxicity noted

Symptoms
None stated
