FLOWER

QUICK FACTS

Plant Type: Shrub

Evergreen or deciduous
Suitable for Atlanta Zone 8a (zones 7–11). Perennial in Zone 8; dies back in winter and returns. Fall bloom is valuable when many plants are finishing. Prefers full sun to part shade and good drainage. May need staking or space for height. Mulch crown for winter.
Excellent for back of borders

Growth & Size
Rate: Not stated
Size: 5–7 ft tall (up to 10 ft in ideal conditions), 3–5 ft wide. Tall, robust, clump-forming perennial with thick square stems

Sun

Water

Soil
Average to moist, well-drained soils. Prefers some shelter

Zone 8a
Suitable for Atlanta Zone 8a (zones 7–11). Perennial in Zone 8; dies back in winter and returns. Fall bloom is valuable when many plants are finishing. Prefers full sun to part shade and good drainage. May need staking or space for height.
Mulch crown for winter. Excellent for back of borders

ORIGIN AND CHARACTERISTICS

Origin
Native to Sierra Madre Oriental mountains in Mexico (elev. 4,000–5,000 ft). Not native to North America

Form
Herbaceous perennial or large subshrub. Tall, spreading clump with thick, ridged square stems. Give space

Foliage
Large, bright green, heart-shaped, rough leaves. Widely spaced, decreasing in size up the stem. Aromatic

Flowers and fruit
Butter-yellow / canary yellow flowers in long spikes (8–12 in). Fall bloom. Attracts hummingbirds

Bark
Not stated

PLANTING NOTES

Planting
None stated

HEALTH

Health
Generally low maintenance. No serious problems stated.
Root rot possible in poorly drained sites

Symptoms
None stated
