QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Upright mounding perennial

Growth & Size
Rate: Not stated
Size: 3–4 ft (0.9–1.2 m) high × 2–3 ft (0.6–0.9 m) wide.
Upright mounding herbaceous perennial. Strong habit

Sun

Water

Soil
Average, dry to medium, well-drained soils.
Tolerates a range of soils. Heat and humidity tolerant

Zone 8a
Hardy in USDA Zones 4–8. Excellent for Atlanta Zone 8a. Hybrid aster combining deep purple flowers of New England aster with the bushy habit and aromatic leaves of aromatic aster. Late summer to fall bloom. Extremely heat and drought tolerant. Attracts pollinators. Introduced 2023 by Intrinsic Perennials.
Strong performer for the South

ORIGIN AND CHARACTERISTICS

Origin
Hybrid of Symphyotrichum oblongifolium (aromatic aster) and Symphyotrichum novae-angliae (New England aster). Introduced in 2023 by Brent Horvath of Intrinsic Perennials (Hebron, Illinois). Selected for deep purple color, bushy habit, and toughness. Patent pending

Form
Upright mounding perennial. Aromatic foliage. Dense clusters of deep purple daisy-like flowers with yellow centers in late summer to early fall. Strong stems. Attracts butterflies and bees. Deer resistant. Combines best traits of both parents. New hybrid aster combining the best of aromatic and New England asters. Deep purple fall flowers. Strong habit and heat/drought tolerance. Attracts pollinators. Introduced 2023.
Excellent for the South

Bark
Not stated

PLANTING NOTES

Establishment

Plant in full sun to part shade with well-drained soil. Excellent for borders, meadows, pollinator gardens, and late-season color. Pinch if desired for bushiness. Cut back after flowering. Low maintenance. Outstanding new hybrid for Atlanta

HEALTH

Health

Generally pest- and disease-free. Extremely heat and drought tolerant. Attracts pollinators. Deer resistant. Occasional powdery mildew possible. No serious problems stated as dominant. Excellent hybrid selection

Symptoms

None stated
