QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Suitable for Atlanta Zone 8a. Hardy Zones 5–9. Prefers consistently moist to wet soil. Afternoon shade beneficial in hot climates to reduce leaf scorch. Not stated for specific Atlanta urban performance beyond general hardiness and moisture preference

Growth & Size
Rate: Not stated
Size: - 0.5–1 ft tall × 0.5–1 ft wide

Sun

Water

Soil
- Consistently moist to wet soil.
- Not particular as to soil type or pH

Zone 8a
Suitable for Atlanta Zone 8a. Hardy Zones 5–9. Prefers consistently moist to wet soil. Afternoon shade beneficial in hot climates to reduce leaf scorch. Not stated for specific Atlanta urban performance beyond general hardiness and moisture preference

ORIGIN AND CHARACTERISTICS

Origin
- Cultivar of Acorus gramineus, which is native to East Asia (Japan, Korea, China). - Not native to North America

Form
- Dwarf clump-forming herbaceous perennial. Spreads slowly by rhizomes. Grass-like tuft of narrow leaves

Foliage
- Narrow, grass-like leaves striped yellow and green, primarily appearing yellow. Semi-evergreen. - Scorched leaf tips if soil dries

Flowers and fruit
- Inconspicuous flowers. Not showy

Bark
- Not applicable (herbaceous perennial)

PLANTING NOTES

Establishment
- Plant in moist to wet soil or at pond/stream margins. Container planting in water gardens can limit spread.
- Divide if center thins

HEALTH

Health
- No serious insect or disease problems stated.
- Leaf scorch if soil dries

Symptoms
None stated
