QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Herbaceous perennial

Growth & Size
Rate: Not stated
Size: 3.5 ft (1 m) tall × 5 ft (1.5 m) wide typical. Dense, uniformly broad-rounded habit maintained all season. Some trial sizes ~42 × 77 in.
Vigorous with many stems

Sun ☼

Water ●●○○○

Soil
Moist but well-drained. Fairly adaptable. Best on acidic to neutral soils (chlorosis risk on high pH)

Zone 8a
Hardy Zones 4–9. Suitable for Atlanta Zone 8a. Drought- and heat-tolerant once established. Prefers full sun, well-drained, preferably acidic to neutral soil. Strong performer in trials

ORIGIN AND CHARACTERISTICS

Origin
Primary hybrid of *B. sphaerocarpa* and *B. albescens*. Bred at Chicago Botanic Garden

Form
Herbaceous perennial. Dense, spreading, mounded habit. Charcoal-gray-tinted stems in spring. Deep-rooted. Primary hybrid of *B. sphaerocarpa* and *B. albescens*. PrairieBlues series. Profuse early bright yellow bloom with excellent habit

Foliage
Medium to dark green trifoliate leaves.
Attractive backdrop. May chlorose on high pH soils

Flowers and fruit
Amazing profusion of vibrant lemon-yellow flowers on charcoal-gray stems. Dramatically displayed above foliage. Early May (about 10 days ahead of *B. sphaerocarpa*), ~3 weeks. Attracts butterflies; Rarely sets fruit. Gray pods when present

Bark
Not woody

PLANTING NOTES

Establishment

Low maintenance. Plant in permanent location. Excellent dense habit all season. Suitable for borders, pollinator gardens. Heat and humidity tolerant. Prefer acidic soils

HEALTH

Health

Good to excellent disease resistance. Possible seed weevil. Genista broom moth may defoliate in warmer climates. Deer-resistant. No serious problems stated. Rarely sets fruit

Symptoms

None stated
