QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Grown as an annual in Atlanta Zone 8a. Thrives in summer heat and humidity. Not reliably perennial.
Stays hardy until first frost

Growth & Size
Rate: Not stated
Size: 4–10 in (10–25 cm) tall × 12–20 in (30–51 cm) wide.
Low-growing, spreading to trailing habit. Some list ~8–10 in tall × 20 in wide at maturity

Sun ☼

Water 💧💧○○○

Soil
Well-drained. Tolerates average garden soils. Prefers slightly acidic pH (approx. 5.5–6.5). Not particular as to soil type once drainage is good

Zone 8a
Grown as an annual in Atlanta Zone 8a. Thrives in summer heat and humidity. Not reliably perennial. Stays hardy until first frost

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of *Angelonia angustifolia* (native to Mexico, Caribbean, Central America). Grown as annual in most of the U.S.; tender perennial in Zones 9–11

Form
Spreading, trailing groundcover or basket plant. Dense mat-forming. Fast growth. Ball Seed cultivar ‘Balangspinkim’. Low-maintenance summer color for beds, borders, containers, and baskets

Foliage
Glossy green, narrowly strap-shaped to lanceolate leaves. Scented foliage noted

Flowers and fruit
Orchid-like (snapdragon-like) pink flowers in spikes. Continuous bloom late spring through frost.
Self-cleaning; little or no deadheading needed

Bark
Not applicable (herbaceous)

PLANTING NOTES

Establishment

Plant after last frost in full sun. Space 9–16 in apart.
Fertilize lightly once a month during active growth. No pruning or deadheading required for continuous bloom. Cut back by half mid-season if desired to rejuvenate. Overwinter indoors only in cold climates (treat as annual in Atlanta Zone 8a)

HEALTH

Health

No serious problems stated. Heat- and humidity-tolerant. Attracts butterflies. Deer-resistant. Possible issues (general to genus): root rot in poorly drained soil; occasional whitefly or caterpillars in production. Self-cleaning flowers

Symptoms

None stated
