QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 4–6 in (10–15 cm) high × 1–2 ft (30–60 cm) wide; mat-forming, spreads vigorously

Sun

Water

Soil
Medium moisture, well-drained soils; thrives in sandy or gravelly soils; drought tolerant once established.
Prefers alkaline to neutral pH

Zone 8a
Hardy in USDA Zones 2–9. Fully suitable for Atlanta Zone 8a

PLANTING NOTES

Establishment
Plant in full sun with good drainage. Low maintenance once established. Shear lightly after flowering. Excellent for rock gardens, slopes, borders, groundcover, or cascading over walls. Attracts butterflies

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Phlox subulata, native to eastern North America. 'White Delight' is an older American selection known since the mid-20th century. Not native as a specific cultivar

Form
Evergreen (or semi-evergreen) mat-forming perennial with dark green, needle-like foliage. Masses of large pure white flowers in mid to late spring (May–June), blanketing the foliage for 3–4 weeks. No fall color change noted; foliage remains green. Strong and vigorous. Forms a dense cushion or carpet. Propagate by softwood cuttings or division. Little care required

Foliage
Not stated

Flowers and fruit
Not stated

Bark
Not stated

HEALTH

Health
No serious problems stated. Trouble-free, deer resistant, salt tolerant. Shear after flowering to maintain form and promote next year's blooms

Symptoms
None stated
