QUICK FACTS

Plant Type: Evergreen fern

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: Leaves (fronds) 50–160 cm (20–63 in) long; clump-forming with short- to long-creeping stems.
Spreads moderately

Sun

Water

Soil
Moist to wet soils. Tolerates a range of conditions including roadsides, ditches, riverbanks, woodlands, and limestone sinks

Zone 8a
Excellent for Atlanta Zone 8a. Native to Georgia. Heat and humidity tolerant. Outstanding evergreen fern for moist woodland gardens, rain gardens, and shaded borders. Spreads by rhizomes. Low maintenance once established. Attractive texture

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Native to the southeastern United States and extending into Mexico, West Indies, Central America, and northern South America

Form
Clump-forming evergreen fern with monomorphic fronds. Short- to long-creeping rhizomes

Foliage
Large, broadest at base, gradually tapered fronds. Pinnae incised 3/5–4/5 of width. Straw-colored petioles with brown scales at base. Hairy indument on costae and veins. Evergreen

Flowers and fruit
Not stated

Bark
Not stated

HEALTH

Health
Generally pest- and disease-free.
No serious problems stated. Deer resistant in many settings

Symptoms
None stated
